Office of Analytics

## **HIV Prevention and Surveillance Program**

Joe Lombardo, Governor, State of Nevada Cody Phinney, MPH, Division of Public and Behavioral Health Richard Whitley, MS, Department of Health and Human Services Ishan Azzam, PhD., MD., Division of Public and Behavioral Health

#### **PURPOSE**

The primary purpose of the Nevada 2023 HIV Fast Facts report is to provide statistics and trends on HIV and HIV Stage 3 (AIDS) in Nevada. This annual publication is a reference document for policymakers, program managers, health planners, researchers, and community members who are concerned with the public health implications of this disease.

#### **METHODS**

The data used for this report is information gathered between January 1, 2023 to December 31, 2023 and was obtained from the enhanced HIV/AIDS Reporting System (eHARS). Statistics provided in this publication are based on provisional data. The eHARS database application is provided by the Centers for Disease Control and Prevention (CDC) and is maintained by the Nevada Division of Public and Behavioral Health (DPBH) HIV Prevention and Surveillance Program (HPSP). The data is collected from medical laboratories, state and local health departments, and other community providers. The HIV case definition for this report utilizes the 2014 case definition. Per the CDC, an individual may be diagnosed concurrently with both HIV and HIV Stage 3 (AIDS) within the same year, allowing them to be counted in both the HIV incidence and HIV Stage 3 (AIDS) incidence tables.

#### **DATA CONSIDERATIONS**

Recent improvements in the timeliness of death ascertainment and national case deduplication efforts are reflected within this report's data. These efforts may be more apparent when comparing 2022 and 2023 Nevada HIV Fast Facts reports to previous iterations.

Due to changes in eHARS variables, data stratified by transgender status is not available in the 2023 Nevada HIV Fast Facts reports as it has been in previous years and is reported by sex assigned at birth only. Future Fast Facts reports will continue to report incidence and prevalence by gender including transgender identity.

#### **TECHNICAL NOTES**

Per the Nevada Administrative Code (NAC) 441A.040, HIV is a reportable communicable disease as prescribed by NRS 441A.150, a diagnosis of HIV is reported to the local health authority by providers, medical facilities, and laboratories.

- Age Group is defined as the age of the individual at the time of the HIV and/or HIV Stage 3 (AIDS) diagnosis.
- All other counties include Carson City, Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, and White Pine Counties.
- Annual % Change is the percent increase or decrease relative to the number of cases in 2022. When interpreting data sets from small case counts, there may be a high variability.
- Column % is the percentage of the observations in the column's category.
- Female refers to persons assigned female at birth.
- Male refers to persons assigned male at birth.
- N is the total case count in the population.

- n (used for birth sex stratification) is the case count within a specific category (e.g., males).
- New HIV diagnoses are diagnoses counted in eHARS surveillance statistics and include HIV and HIV Stage 3 (AIDS) cases diagnosed in Nevada, both living and deceased. The surveillance data excludes HIV and HIV Stage 3 (AIDS) cases diagnosed in other states but currently living in Nevada.
- New HIV Stage 3 (AIDS) diagnoses are diagnoses counted in eHARS surveillance statistics and include HIV Stage 3 (AIDS) cases diagnosed in Nevada, both living and deceased. The Nevada 2022 HIV Fast Facts Page 3 of 22 surveillance data excludes HIV Stage 3 (AIDS) cases diagnosed in other states but currently living in Nevada.
- Persons living with HIV include data on persons living in Nevada with HIV (not yet HIV Stage 3 (AIDS)) and HIV Stage 3 (AIDS) based on the current address listed in eHARS. These persons may or may not have been diagnosed with HIV or HIV Stage 3 (AIDS) in Nevada.
- Provisional data is data that is not yet complete and may be subject to revision as information continues to be collected and analyzed.
- Population is based on the 2023 population projections from the Nevada State Demographer vintage 2023 data.
- Rate is the number of cases per 100,000 persons and calculated by using the 2023 population projections from the Nevada State Demographer vintage 2023 data.

Persons living with HIV data include data on persons living in Nevada with HIV (not yet stage 3 (AIDS)) and stage 3 (AIDS) based on the current address listed in the HIV/AIDS Reporting System (eHARS). These persons may or may not have been diagnosed with HIV or stage 3 (AIDS) in Clark County or Nevada.

§Persons Living with HIV indicate any person regardless of HIV staging, including HIV stage 3 (AIDS), living in Clark County in 2023.

<sup>\*</sup> Rates per 100,000 population were calculated using 2023 population projections from the Nevada State Demographer vintage 2023 data.

New stage 3 (AIDS) diagnoses are counted in eHARS surveillance statistics and include stage 3 (AIDS) cases where resident county at time of diagnosis is All Other Counties. The surveillance data excludes AIDS cases diagnosed in other states but who currently live in All Other Counties.

All other counties include Carson City, Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, and White Pine Counties.

<sup>\*</sup> Rates per 100,000 population were calculated using 2023 population projections from the Nevada State Demographer vintage 2023 data

Persons living with HIV data include data on persons living in All Other Counties with HIV (not yet stage 3 (AIDS)) and stage 3 (AIDS) based on the current address listed in the HIV/AIDS Reporting System (eHARS). These persons may or may not have been diagnosed with HIV or stage 3 (AIDS) in All Other Counties or Nevada.

§Persons Living with HIV indicate any person regardless of HIV staging, including HIV stage 3 (AIDS), living in Nevada in 2023.

Due to rounding, percents may not add up to exactly 100.0% and certain rate categories may not add up to the total rate.

<sup>^</sup>All other counties include Carson City, Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, and White Pine Counties.

<sup>\*</sup> Rates per 100,000 population were calculated using 2023 population projections from the Nevada State Demographer vintage 2023 data.
