Notes:

Methods: Overdose deaths were extracted from the Nevada Electronic Death Registry and matched to AVATAR, the state mental health facilities database.

Limitations: AVATAR includes data for State Mental Health Facilities only. Anyone who received mental health services from a Nevada State Facility at any point in their life would be included in AVATAR.

ICD-10 codes for underlying cause of death: X40-X44, X60-X64, X85, Y10-Y14

ICD-10-CM codes for contributing cause of death: T40.0-T40.4, T40.6
